

UM360 USB Desktop Microphone

UM360

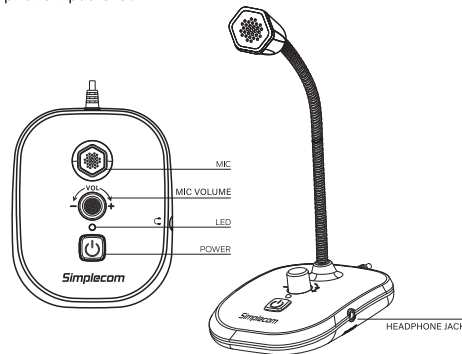

User Manual

About Product

UM360 is a desktop computer microphone that mainly designed for online chatting, online meeting or voice recording. It offers excellent audio quality with clear sound and high sensitivity. USB microphones typically have higher sensitivity than traditional 3.5mm jack microphones. This means they can capture more detail in your voice, resulting in a clearer and more accurate sound.

This USB microphone also features a headphone jack that allows you to connect a headphone for listening and monitoring the sound in real-time. A flexible neck allows you to easily adjust the position of the microphone for optimal recording or chatting.

A power button with an indicator makes it easy to see when the microphone is turned on and ready to use. It also comes with a microphone volume knob, which makes it easy to adjust the microphone input level.

Features

- USB microphone features clear audio quality and high sensitivity
- Built-in 3.5mm headphone jack, easy to connect headphones for listening
- Microphone volume knob allows you to easily adjust the input level
- Easily adjustable position with flexible neck

Microphone Setting

Windows 7

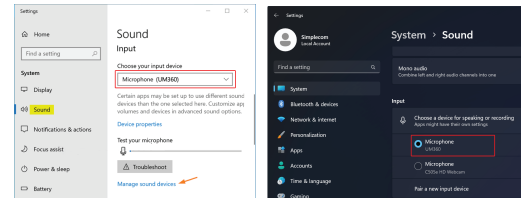

You can right-click the sound icon in the System Tray, and get a quick menu that gives you access to Sound setting. You can also find sound setting under: **Control Panel > Hardware and Sound > Sound**

Windows 10/11

Click **Start > Settings > System > Sound**

In Sound settings, go to **Input** and select the microphone or recording device you want to use.

Windows 10

Windows 11

Headphone Jack Setting

No Sound From PC With UM360 Connected

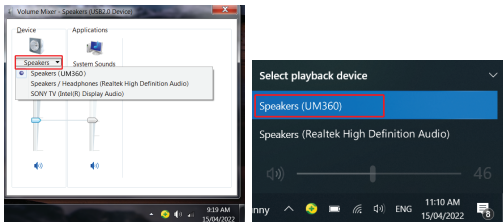

When you connect UM360 to your PC for the first time, the system may switch the default sound output to the headphone jack on UM360, you can switch back to computer speaker if you don't need sound output from the headphone jack.

How to select default sound output on Windows?

Windows 7: Click "Sound" icon in system tray, then click "Mixer", you can select default speaker at drop down list.

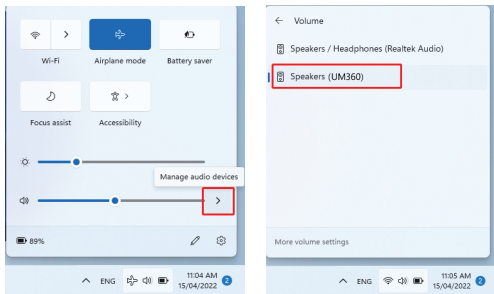

Windows 10: Click "Sound" icon in system tray, then click "Select playback device" to select default playback device.

Windows 11: Click "Sound" icon in system tray, then click "Manage audio device" icon next to volume control, then select default playback device.

Windows 7

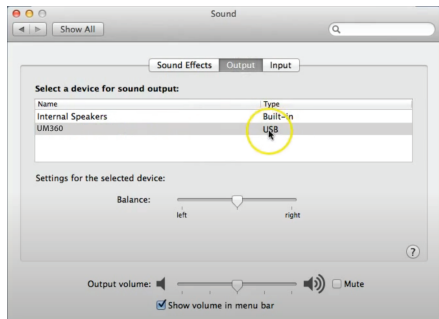

Windows 10

Windows 11

MacOS

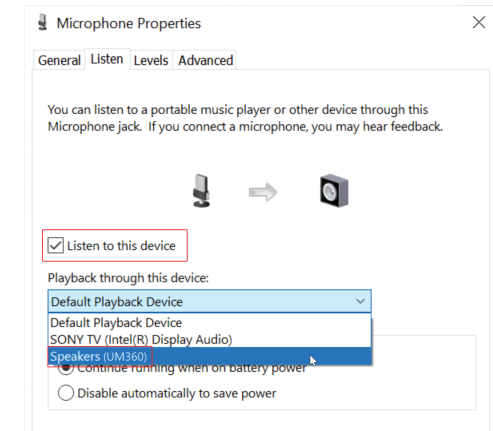

Open Apple Menu then select "System Preferences", go to "Sound" icon, then click "Output" tab, then select the default sound output device.

Microphone Monitoring

Windows PC users can listen to Microphone through Headphone Jack, this is useful when you need to test your microphone, or if you want to hear your words as you say them to gauge quality.

1. Right-click the Windows button and select **Run**, or press **Windows Key + R**
2. Enter `mmsys.cpl`, then click OK to open the Sound menu
3. Click the Recording tab, and double-click the microphone icon
4. In the new window, go to **Listen** tab, then Enable **Listen to this device**
5. Expand the menu under **Playback through this device** and select UM360 for microphone's audio

Warranty

1 Year limited Warranty. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
